

Guido Kamphuis

studied Medicine at the Vrije Universiteit Amsterdam (1998-2005) and completed his residency training in Urology (2007-2012) at the Academic Medical Centre in Amsterdam with Professor Theo de Reijke and Professor Jean de la Rosette. He completed a three month fellowship in endourology at the Tenon Hospital, in Paris (February-April 2012), along side Professor Olivier Traxer. And a three month fellowship in endourology at the Klinik für Urologie Universitätsmedizin Mannheim (September-November 2012), with Professor Stephan Michel. He is working at the moment as staff member at the AMC Amsterdam.

He developed an interest and expertise in the surgical and medical management of urolithiasis and the endoscopic management of urothelial tumours in both lower and upper tract. At the AMC, Guido is part of a researchgroup in the development and implementation of new technologies for urothelial tumours. And has been working on research on treatment of urolithiasis and the optimisation of the stone clinic working closely together with colleagues from nephrology. Besides this he is the medical manager of the clinical urology department.

He has presented several abstracts and videos at international meetings and has authored peered-review articles and book chapters and has supported endourologic workshops at the AMC and has been performing 'live surgery' at several meetings. Besides this he is working at the teaching hospital AMC and training residents urology in endourology and giving lectures to students on urolithiasis.
